

VidiEditor

VidiNet's quick and intuitive browser-based video editing solution for journalists and producers

What is VidiEditor?

VidiEditor is Vidispine's intuitive and quick browser-based editing solution for proxy editing. It provides producers and journalists around the globe with the needed tools for today's remote editing environments. Browser-based, VidiEditor offers a powerful set of features that focus on agile remote workflows without having to compromise on functionality. Users can create and manage editing projects, search for material and drag and drop it into the timeline, frame-accurately edit sequences, and publish high-grade sequences that are air-ready for broadcast or web. VidiEditor today also comes with an offline work mode that eliminates the need for a stable internet connection.

Target user

VidiEditor is used by, journalists, editors, and producers around the globe.
